Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach a device for reducing the phase noise of a quasiperiodic signal coming from a quasiperiodic source having a given fundamental frequency, the device comprising a physical system for transmitting pulses by transferring particles, wherein the physical system has a characteristic frequency that defines an operating frequency range of the device with a low limit that is dependent on the characteristic frequency, in such a way that for the quasiperiodic signal applied as input, the particles have a mutual repulsive interaction and wherein the physical system delivers pulses at the fundamental frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Durand et al (US 6,750,794) teach a superconducting oscillator counter analog-to-digital converter.

Silver et al (US 5,942,997) teach a superconducting oscillator counter analog-to-digital converter.
